

e. CyberLock®

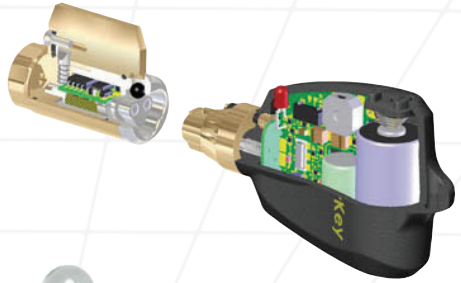

ACCESS CONTROL SYSTEM

Kenstan Locks featuring Videx® CyberLock® core is an innovative lock system that can not only be specified for new applications, but can easily replace or convert existing mechanical locks into a stand alone access control system. With electronic lock cylinders, programmable CyberKeys, and CyberAudit software, you can create a powerful system to track and control access to every lock in your facility.

Some benefits of CyberLock® are:

- CyberLock® electronic cylinders replace standard mechanical cylinders.
- No wiring or battery is required at the lock.
- CyberLocks® cannot be picked.
- CyberKeys cannot be duplicated.
- CyberKeys can be assigned a begin date and expiration date.
- Each key contains a list of locks it can open, with days and times.
- A record of all events is stored in both the locks and the keys.
- One CyberKey opens doorways, padlocks, cabinets, safes, vending machines, and more!
