

## **ABLOY® SMARTDISC** **e. Lock**

### ACCESS CONTROL SYSTEM

#### Overview

New **ABLOY® SMARTDISC** technology revolutionizes industrial locking by combining proven mechanical locking solutions with low-power electronics. The mechanical lock guarantees physical security, while the micro-electronics provides flexibility and a unique electronic key code of every lock. **ABLOY® SMARTDISC** makes it possible to log information such as date and time of opening as well as the names and holders of keys used. Event information can be collected from both keys and locks.

#### Some benefits are:

- No wiring or battery is required at the lock.
- **ABLOY® SMARTDISC** cannot be picked.
- Keys can be assigned a begin date and expiration date.
- Each key contains a list of locks it can open, with days and times.
- A record of all events is stored in both the locks and the keys.
